

PowerAgent 7

Download Instructions

- Navigate to the Software Downloads page: from cycleops.com, click on CYCLEOPS POWER→Software→Download. Register yourself.
- Click on the 'Software' tab on the Software Downloads page for 'Java' installation files. Install the Java Version for your operating system.
- Click on the 'Software' tab for 'PowerAgent 7'. Install PowerAgent 7 for your operating system.
 - The install will provide you with the option of installing the USB Drivers along with PowerAgent. Please do this if you do not have or are not sure the correct USB drivers are installed.
 - PowerAgent 7 will attempt to install into a folder called 'PowerAgent'. If this folder already exists from a previous version of the software, you can either install the software into a different directory or uninstall PowerAgent 5.0.
 - VERY IMPORTANT: Before uninstalling PowerAgent 5.0, export all of your ride data. Ride data will save to the location 'PowerAgent/Data/Export'. Copy the contents of this folder to a safe location on your computer. When you uninstall PowerAgent 5.0 this folder will be wiped out and you will lose all your ride history if you do not copy the contents of this folder and move it out of this directory.
 - Go to Control Panel → Add/Remove Programs and uninstall PowerAgent 5.0.
- Go to your Start Menu (Windows) or Applications (Mac) and open the application. You may want to create an icon on your desktop. The installer does not do this automatically.
- Select the menu option 'File → Add User'. Follow the 'Add User' Wizard to add a new user.
- Connect your PowerTap CPU or Indoor Cycle Console to your computer using the USB or serial connection.
 - INDOOR CYCLE USERS: Before downloading your data, you must update the firmware on your console. To do this, select the menu option 'Tools → Update Firmware' in PowerAgent. Please refer to Help or the Software Manual for more information on how to do this.
- Highlight the user you would like to download data for.
- Select the menu option 'File → Download'. PowerAgent will automatically detect the device.
- A window appears displaying all the activities that are to be downloaded into PowerAgent.
- Select the activities you wish to download and click on the 'Save' icon. The activities are saved for the selected user.
- Double-click on the downloaded activities and a window will open so that each activity can be analyzed.

For more detailed instructions, download the PDF Software Manual from www.cycleops.com or you can view the Software Manual through the Help → Help Contents menu option.
